

Kickoff meeting open source tooling for open source compliance work group

Agenda

Top	Name	Actors
1.	Introduction and expectations	All
2.	Vision	All
3.	Introduction of the existing work	Oliver
4.	Next steps	All
5.	Fixed meeting dates/times	Oliver

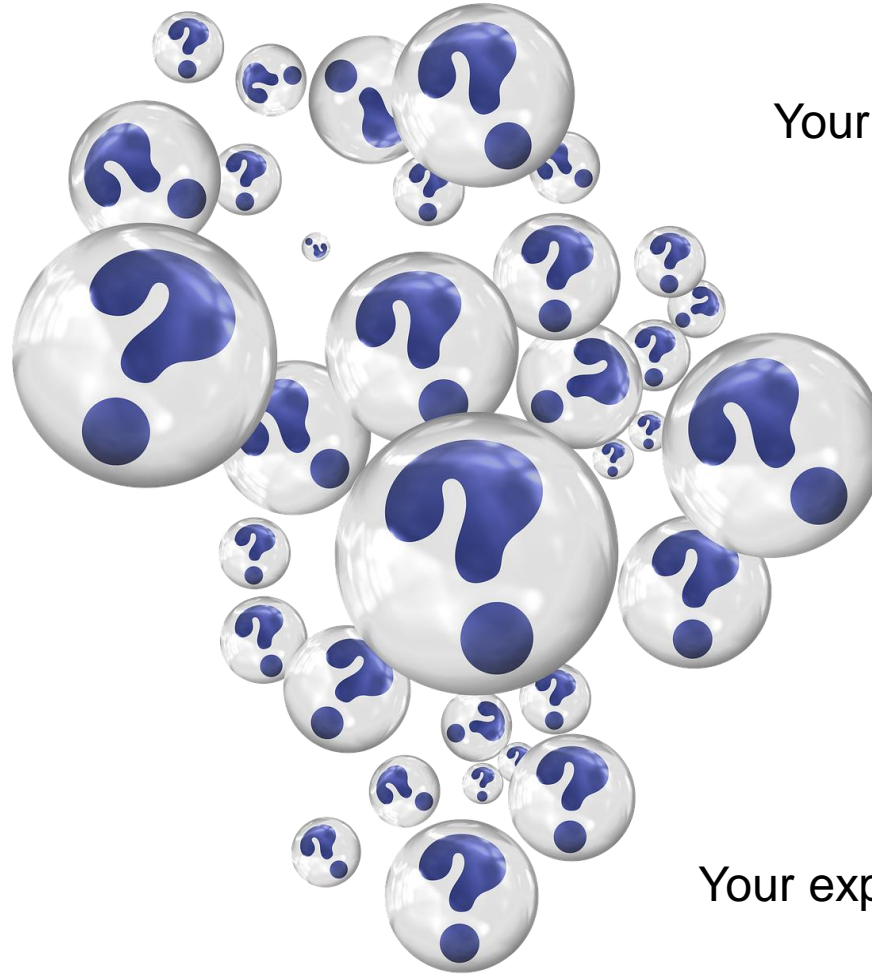

Meeting proceedings: is it ok that these meetings are recoded – for compiling the minutes for the others?

Introduction and expectations

Who you are

Company you work for

Tasks you do

Your expectation regarding the work results

Your expectation regarding the working group

Vision

Long Term Vision

OSS – Compliance processes and tools
OSS – Contribution processes and tools
Security vulnerability management
Export control and customs classification
OSS – selection process

fully integrated in the DevOps cycle.

Integrated, automated – end to end OSS compliance toolchain made with OSS

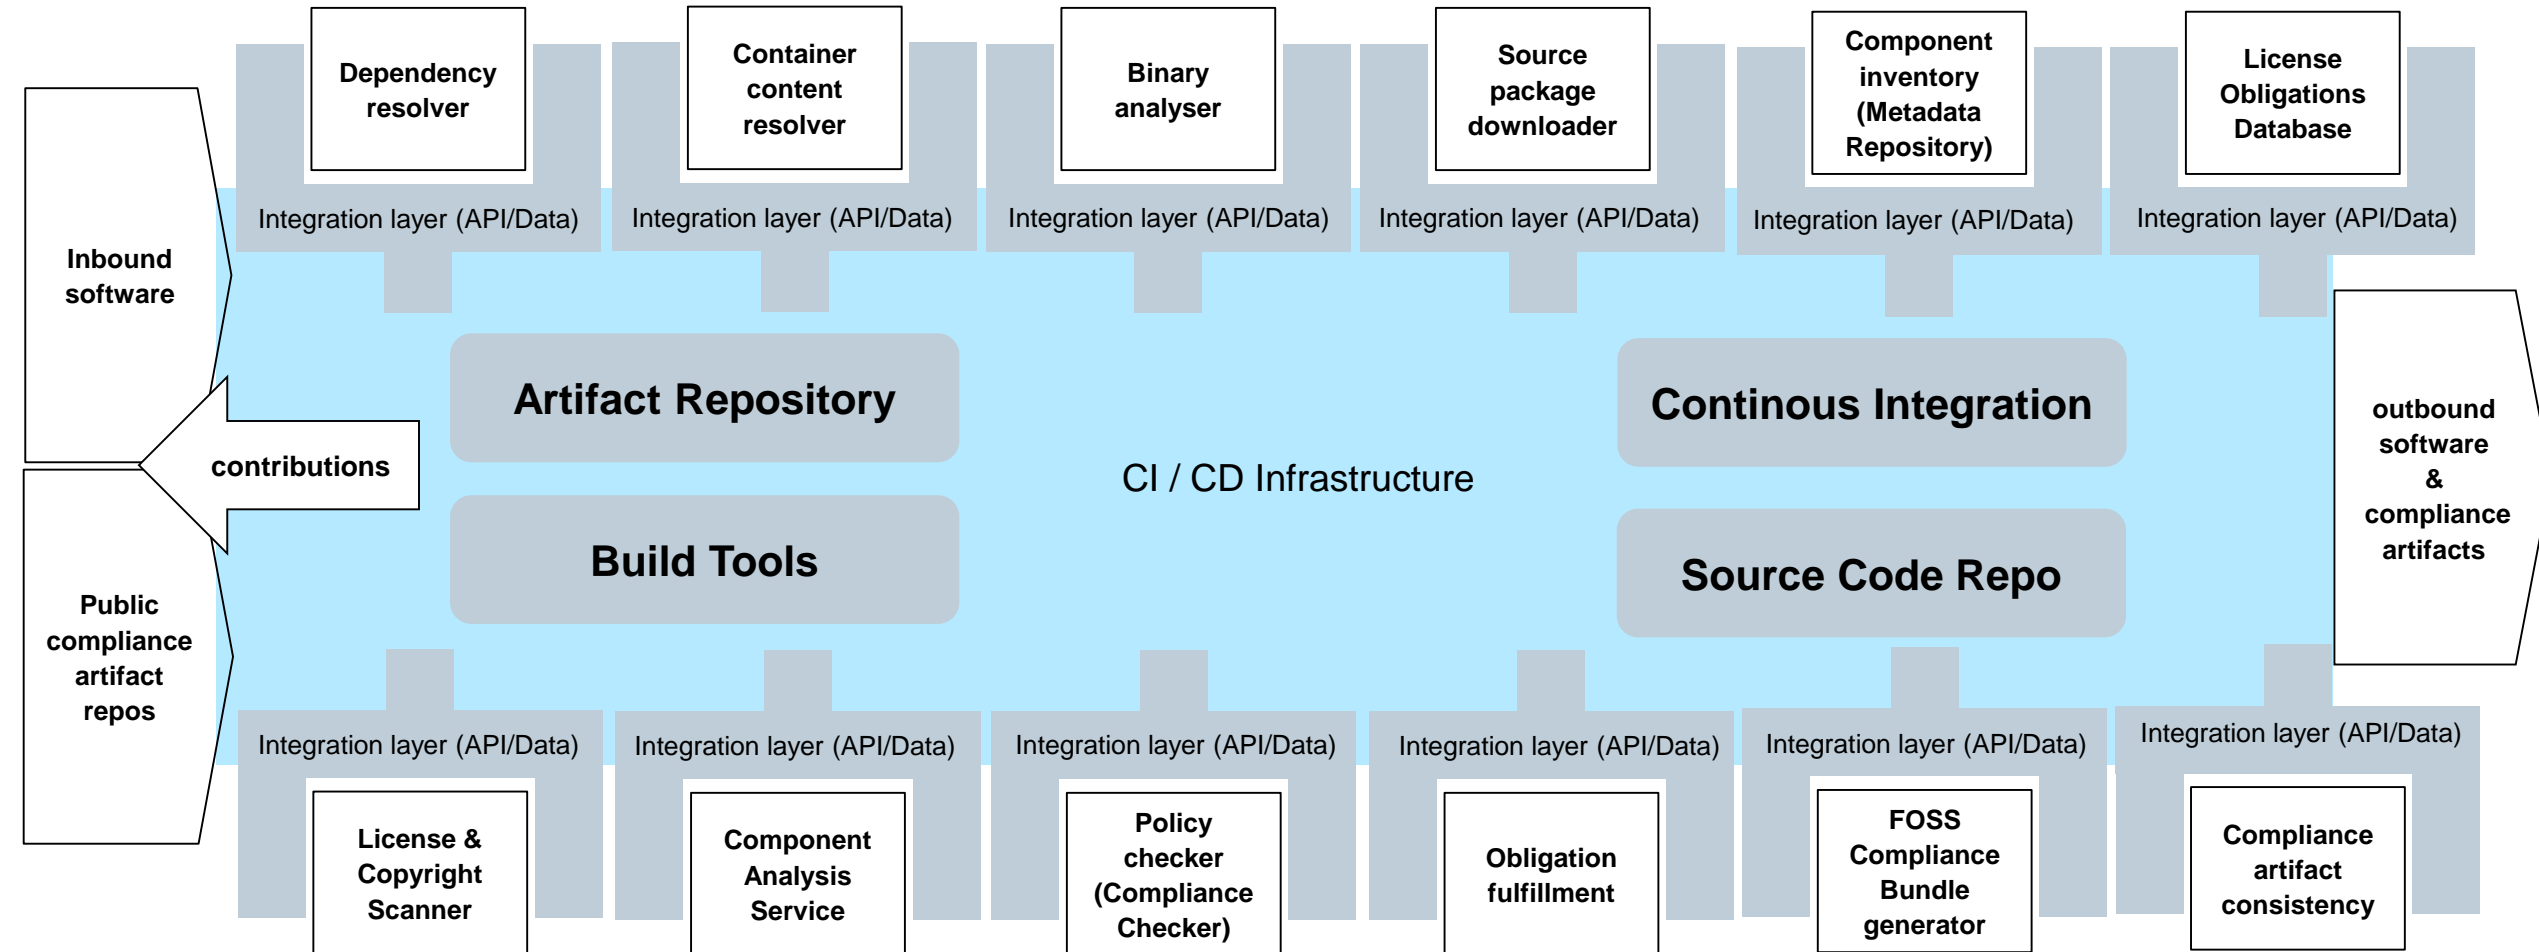

To build an integrated end to end compliance toolchain is not about to build a monolithic monster, it is about to use current available Open Source tools and define and implement the needed APIs/Data structures they need to provide, in order to plug them into the current set up CI/CD workflow and to enable them to trigger other Open Source compliance tools in a way that they seamlessly interact with each other and potential external data sources.

The already existing projects remain independent projects

We are making turn-key Open Source tooling for Open Source Compliance

Big Picture – Integrated Compliance Toolchain

Integrated, automated – end to end OSS compliance toolchain made with OSS

We are making turn-key Open Source tooling for Open Source Compliance

- Identify the functional blocks required
- Identify the workflows
- Identify the required data and data flows
- Implement provide the needed APIs (as contributions)
- Provide the glue Code
- Provide easy to deploy building blocks
- Documentation
- Spread the word
