2.	Sw360antenna	Lars
3.	Reference slides	Oliver
4.	Next steps	All

We are focused on building a turnkey OSS compliance toolchain ecosystem with OSS tools as an OSS project. To accomplish this we:

- Use existing tools, which all remain independent
- Provide the concepts and glue code to hook them easily together or to be integrated easily in any existing environment
- Provide reference workflows, that can be easily adapted to serve own needs
- Provide the tools hooked together as a reference toolchain that can be used without fees by anybody

Join us in creating a new era of OSS compliance
